K-PHOS

Guaranteed Analysis (min):

Phosphorus (P) 14.5% w/v (Equivalent to 33% P₂O₅)

Potassium (K) 22% w/v (Equivalent to 26.5% K₂O)

INFORMATION:

K-PHOS is a **PHOSPHOROUS ACID** by-product. It is comprised of a mixture of Potassium salts, namely Mono-Potassium Phosphite, Di-Potassium Phosphite, and Tri-Potassium Phosphite.

DIRECTIONS FOR USE:

K-PHOS is designed for soil and foliar applications. **K-PHOS** is suitable for all crops. The general rule of thumb is to apply it **separately** when warranted. The following is a guideline for the different category of crops.

Soil Application:

3-3.5 Lt/Ha injected via the fertigation system or sprayed prior to irrigation.

Foliar Application:

- **Orchards and Vineyards:** 400-500 mls/Ha early in the season, repeat application 3-4 weeks later.
- **Broadacre:** 200 mls/Ha applied early in the season .
- **Greenhouse Crops:** 100 mls/100 Lt. water every 3-4 weeks.
- **Field Crops:** 300-400 mls/Ha early in the season. Repeat application 3-4 weeks later.

DO NOT apply when temperature exceeds 30C
