# MAG-MAX

Magnesium (Mg) 10%

## Prevents and treats Magnesium deficiencies

### PRODUCT INFORMATION:

- **MAG-MAX** is a **foliar** Magnesium product.
- **MAG-MAX** is specially formulated using organic chelating and complexing agents in order to assure better and quicker uptake and translocation within the plant tissue.
- **MAG-MAX** provides quick, efficient, safe, and **cost-effective** way of treating serious Magnesium deficiency disorders in most crops.
- **MAG-MAX** has a formulation that facilitates **efficient and prompt uptake** as well as translocation in the plant tissue.

### MAGNESIUM DEFICIENCIES:

- Are widespread.
- Are very common, especially on acid soils.
- Unlike Trace Elements, Magnesium is a **Major Element**. To correct its deficiencies by foliar applications, many applications are required at high rates of application. It is always advisable to apply soil magnesium when magnesium is deficient.
- May be the result of **other nutritional imbalances**, especially high levels of Nitrogen, Calcium, & Phosphorus.

## DIRECTIONS FOR USE

### APPLES:

600 – 900 gr/Ha (depending on canopy size) 2-3 weeks after fruit set.

600 - 900 gr/Ha (depending on canopy size) when fruit reaches approx. half full size.

### CITRUS:

800-1200 gr/Ha (depending on canopy size) when fruit reaches approx. half size.

800-1200 gr/Ha (depending on canopy size) as fruit colour turns orange

### CUT FLOWERS:

700 gr/Ha during early stem formation.

800 gr/Ha just before bud formation.

**GREENHOUSE CROPS:**

300 gr/200 Lt water. Repeat application every 2-3 weeks

**FIELD CROPS:**

600 gr/Ha at 6-7 leaf stage.

800 gr/Ha 3-4 weeks later.

**STONE FRUIT:**

600-900 gr/Ha (depending on canopy) soon after petal fall.

600-900 gr/Ha (depending on canopy size) when fruit reaches half size.

600-900 gr/Ha (depending on canopy size) approx. 10-14 days before picking.

**STRAWBERRY:**

400-500 gr/Ha early in the season.

Repeat application every 3-4 weeks or as needed.

**TOMATO:**

700 gr/Ha at first cluster set.

Repeat application every 2-3 weeks.

**FOR OTHER CROPS, APPLY 600-800 GR/HA (TWICE) OR SEEK THE ADVICE OF YOUR DISTRIBUTOR.**

**COMPATIBILITY:**

**MAG-MAX** is compatible with most agricultural chemicals and fertilizers. It is however advised that a small compatibility test be done before mixing with other farm chemicals.

**PACKAGING:** 5 kg reusable plastic pails.

Sincerely

(electronic mail)
